Seminar on Traditional knowledge 2019

SEMINAR ON Traditional knowledge a treasure of knowledge

24th
OCTOBER 2019

DEPARTMENT OF BOTANY
Flora Club &
Biodiversity Club
NSS COLLEGE NEMMARA

Traditional knowledge (TK) is a difficult concept to define because it encompasses such diversity. TK, or indigenous knowledge, covers wide ranging subject areas from art to agriculture, as well as medicinal uses of plants and traditional systems of medical diagnosis. It may exist in indigenous or local communities as secret oral traditions that have been passed down over generations, but it may also be documented in publicly available written or even electronic media.

Innovations based on TK may benefit from patent, trademark, and geographical indication protection, or be protected as a trade secret or confidential information. However, traditional knowledge as such - knowledge that has ancient roots and is often oral - is not protected by conventional intellectual property systems. We believe that this seminar will enhance our awareness in the field of Traditional Knowledge. We request your esteemed presence and active participation to make this seminar a grand success.
